Relocation of Construction Fencing Resulting in Lost Parking Spaces

On **March 3, 2011** at **7:00 a.m.**, due to upcoming construction activities, Carillion will need to move its construction fencing located directly to the south of the Intergenerational Wellness Centre over onto the parking lot located in front of Unit 4 (see red in diagram on right, labeled "New Fencing").

Unfortunately, the relocation of this fencing will result in the loss of a row of parking spaces that are in the Unit 4 parking lot (see green hatching marked "Parking Spaces" in diagram on right). However, the two handicapped parking spaces in that lot will remain, and emergency vehicles will still be able to enter and exit the lot.

These parking spaces will be unavailable for the duration of the construction project.

Carillion is asking that no one park in that lot in the early morning hours of March 3rd so that they can begin their work right at 7:00 a.m.

Thank you for your ongoing patience during the construction process.
