viii	ACKNOWLEDGMENTS
xi	ABOUT THE AUTHORS
1	INTRODUCTION
3	1 CLINICAL OVERVIEW
4	Postpartum depression (PPD)
6	Are there effective treatments for depression?
7	Different clinical presentations of depressive symptoms
10	Other types of postpartum mood disturbance
14	Summary
15	2 RISK FACTORS
16	Risk factors for PPD
16	Evidence-based risk factors for PPD
18	Factors not associated with developing PPD
18	Strong predictors of PPD
20	Moderate risk factors
21	Weak risk factors
22	Clinical overview
22	Summary
23	3 DETECTION AND SCREENING
24	Difficulties in detecting PPD
25	What is screening?
26	Criteria for a screening program
30	Screening tools used to detect PPD
32	A few points to consider when using screening tools

33	When to screen for PPD
35	Do new mothers benefit from PPD screening?
36	Should service providers screen women for PPD?
38	Summary
39	4 PREVENTION
40	What are preventive interventions?
40	Preventive interventions for PPD
41	Psychosocial interventions
43	Educational interventions
43	Improving quality of care
45	Psychological interventions
47	Pharmacological interventions
47	Hormonal interventions
49	What can service providers do?
50	Summary
51	5 TREATMENT
52	Current options for treating PPD
52	Making informed, evidence-based decisions about PPD treatment
53	Evaluating antidepressants used for PPD
55	Use of antidepressants while breastfeeding
56	Psychotherapy as a treatment for PPD
58	Hormone therapy
58	Electroconvulsive therapy (ECT)
59	Bright light therapy
59	Complementary or alternative therapies
60	Summary
61	6 MAKING REFERRALS FOR ASSESSMENT AND TREATMENT
61	When should service providers make a referral?
66	Referrals to child protection services
67	Where should service providers refer a mother who may have PPD?
70	What role do various services and professionals play in assessing and treating PPD?
76	Summary
77	7 IMPACT ON THE FAMILY
78	Severe PPD affects all family members
78	Partners and family members need information about PPD
79	Partner support is invaluable
81	Fathers' and/or partners' reactions to parenthood and PPD
82	Postpartum distress in fathers and/or partners
83	Possible impact of PPD on the infant
84	Impact of PPD on other family members
85	Summary

87	8 ISSUES FOR SPECIFIC POPULATIONS OF POSTPARTUM WOMEN
88	Women of diverse ethnocultural origins
89	Motherhood in immigrant and refugee populations
89	Presentation of depressive symptoms in diverse ethnocultural groups
90	How childbirth rituals may protect women from PPD in some cultural groups
92	Access to and use of health services among immigrants
93	PPD among women in rural and remote communities
95	PPD in women who use substances
97	Women with current and/or past experience of abuse or violence
98	PPD in Aboriginal women
99	PPD in adolescent and single mothers
100	PPD in lesbian and bisexual mothers
102	Depression in adoptive mothers
103	Women with chronic mental illness or other disabilities
106	Summary
107	9 SELF-CARE STRATEGIES FOR POSTPARTUM WOMEN
108	Developing realistic expectations about motherhood
108	Getting as much sleep and rest as possible
110	Eating well
111	Getting exercise
112	Developing and taking advantage of a support network
114	Heeding the warning signs of stress and responding appropriately
116	Summary
117	10 CASE STUDIES
117	Case #1: Lucy
118	Case #2: Leila
120	Case #3: Maryann
121	Case #4: Susan
122	Case #5: Ghaada
123	Case #6: Linda
127	11 WOMEN'S STORIES OF RECOVERY
127	Roxanne's Story
130	Sheri's Story
133	REFERENCES
147	GLOSSARY
151	APPENDICES
151	Appendix A: Edinburgh Postnatal Depression Scale
153	Appendix B: Scoring the Edinburgh Postnatal Depression Scale
155	Appendix C: Antidepressant dosages
156	Appendix D: Resources for service providers and parents
