

# Are You Healthy and Not Taking Any Psychotropic Medication?

## If so, you might be able to take part in a brain imaging study

We are currently seeking healthy volunteers to take part in a positron emission tomography (PET) study. Persons eligible for a screening interview must meet the following criteria:

- Eighteen to thirty years of age
- No medical or psychiatric problems
- No history of psychotropic medication such as antidepressants, antipsychotics, etc.
- No alcohol or substance abuse in the past six months
- No significant head injury
- No metal implants

Financial compensation provided

If you are interested in participating, please contact

Mental Challenge PET Research Study Line
