

Schizophrenia Genetics Study

The Centre for Addiction and Mental Health (CAMH) with the University of Toronto is conducting a study on the genetic factors that may be involved in the development of schizophrenia. We are looking for participants to help with this project.

Eligibility:

- Must be 18 years or older
- Clear diagnosis of Schizophrenia or Schizoaffective disorder (no mania or hypomania)

What's Involved:

- A single session for an interview that is approximately 1.5 hours
- A small blood sample

An honorarium is offered to participants
