

HAVE YOU RECENTLY STARTED NEW MEDICATION?

IF YOU:

† Have recently (in the last 8 weeks) started one of the following medications:

- ❖ olanzapine (Zyprexa)
- ❖ clozapine (Clozaril)
- ❖ quetiapine (Seroquel)
- ❖ risperidone (Risperdal or Consta)

† Are between ages 14 and 45

† Are concerned about weight gain or want to avoid putting on weight

You may be interested in a program we are evaluating for preventing weight gain. If you participate, you may be placed in the program or a comparison group for the 4 months of the study.

Compensation, transportation, and all study related materials are provided.

If you are interested in participating, or would like more information, please call
