Cognitive Therapy Summer Training Institute

July 23, 24, & 25, 2009

Treating psychiatric problems can be challenging but fortunately there are effective psychotherapies that can help. Cognitive therapy is an empirically validated treatment, which has shown itself to be as effective as antidepressant and anti-panic medication in a number of controlled studies conducted worldwide. The Cognitive Behaviour Therapy Unit at the Centre for Addiction and Mental Health is one of the few centres in Canada devoted to CBT treatment and training.

In cognitive therapy, people explore and identify how attitudes, beliefs, expectations, and automatic thoughts can produce and maintain unpleasant moods. The first step towards change involves becoming aware of self-defeating thinking styles and behavioural patterns. The next step involves experimenting with new ways of looking at things and/or trying out new patterns of behaviour. The focus in this short-term treatment is on the here and now.

The book, "Mind Over Mood" is included in the registration fee.

This CBT Summer Institute can be taken alone, however it also qualifies as the first part of a **CBT Certificate Program** or as part of the **Primary Mental Health Care Certificate Program** from the University of Toronto. For more information on the certificate programs, contact Sia.Maro@uhn.on.ca or 416-603-5734.

FACULTY

Zindel Segal, Ph.D., C. Psych - Dr. Segal is Head of the Cognitive Behaviour Therapy Unit at the Centre for Addiction and Mental Health and is a Founding Fellow of the Academy of Cognitive Therapy. He has an international reputation as an active teacher and trainer in Cognitive Therapy and has led training workshops both locally and as far a field as England, Switzerland and Portugal. Dr. Segal is the Morgan Firestone Chair in Psychotherapy and a Professor in the Department of Psychiatry at the University of Toronto.

Kathleen Corcoran, Ph.D., C.Psych. - Dr. Corcoran is a Psychologist in the Cognitive Behaviour Therapy Unit at the Centre for Addiction and Mental Health, where she teaches and supervises CBT to graduate students, medical residents, and other mental health providers. Before her time at CAMH, Dr. Corcoran was a fellow at the Stanford University School of Medicine. Dr. Corcoran focuses on cognitive behavioural treatment of anxiety and mood disorders and has presented CBT workshops to audiences in Toronto, Vancouver, and California. Dr. Corcoran is an Assistant Professor in the Department of Psychiatry at the University of Toronto.

Lance Hawley, Ph.D., C.Psych - Dr. Hawley is a Psychologist, working in the Cognitive Behaviour Therapy Unit at the Centre for Addiction and Mental Health. His recent professional experience includes positions with the Oakville Centre for Cognitive Therapy, St. Joseph's Healthcare (Hamilton), and the Royal Victoria Hospital (Montreal). Dr. Hawley has been involved in teaching and providing supervision to graduate students as well as mental health professionals, utilizing a CBT framework for the treatment of anxiety and mood disorders.

WHO SHOULD ATTEND

Family physicians and mental health professionals with some familiarity with the cognitive model of emotional problems, who want practical training in using cognitive therapy tools.

FORMAT

Presentations will combine a didactic base with experiential exercises, supervised role-plays, and videotaped clinical vignettes. **Interactivity is central to the experiential exercise and role-plays, and a minimum of 30 minutes at the end of each day is devoted to Q & A.**

PARTICIPANTS WILL LEARN:

- The basic principles in conducting short-term cognitive therapy for Depression and Panic Disorder
- How to assess patient suitability for CBT
- How to formulate a case from a cognitive perspective
- How to identify and implement specific cognitive interventions for Depression and Anxiety spectrum Disorders

AGENDA 2009

Day 1 Thursday, July 23rd
 08.30 - 09.00 Registration
 09.00 - 10.00 What's cognitive about Cognitive Therapy?
 10.00 - 10.45 Exploring links between moods and thoughts
 11.00 - 12.00 Cognitive Case Formulation: A provisional roadmap
 12:00 - 13:00 Lunch (provided on the first day only)
 13.00 - 14.00 VIDEOTAPE: "Identifying Automatic Thoughts in Depression"
 14.00 - 15.00 When is a thinking error not a thinking error: Cognitive Distortions and the patient's environment
 15.15 - 16.15 **ROLE PLAY:** Participants take either the role of therapist or patient in learning how to work with automatic thoughts that are charged with emotion
 16.15 - 16.45 Discussion, Q & A and evaluation
